2020 Commercial Kitchen Equipment Clemtech Partnership

Feed Appeal requires all quotes for cool rooms, refrigeration and kitchen equipment to be for commercial grade products. We will not award grants for domestic products as the warranty is voided if they are used in a commercial capacity. Sourcing quality ovens, refrigeration, stoves, mixers, food processors and other kitchen equipment can be a tedious task. Limited knowledge, experience and time means many organisations expressed frustration last year.

Feed Appeal felt it was best to defer to an experienced commercial kitchen supplier to provide knowledgeable support. Clemtech has been a commercial kitchen equipment supplier since 1998 and offers a broad range of modern, commercial grade kitchen equipment.

Feed Appeal's partnership with Clemtech Australia will offer food relief organisations access to:

Experienced advice

Broad range of products and services

Cost effective quotes

Special discounted pricing on a key range of products

Connection to a reliable source for support with installation, servicing and repair of equipment

There is no obligation to purchase through Clemtech. This partnership was developed to offer support to organisations and help them make informed decisions that build the capacity of their services and improve efficiency.

Below are the contact details for Clemtech and a link to a catalogue of key products (you are not limited to this product list).

If you need a product not mentioned on the catalogue, please contact Clemtech directly and discuss your needs with them.

A quote from Clemtech can be submitted as your required kitchen equipment quote for a Grassroots and Rural Grassroots Grant application.

A quote from Clemtech can be one of the three required for a Major Projects or Rural Major Projects Grant application.
